Search for Communication Facilities,
Riga Air Defense Zone, USSR

Requirement D-223/71
NPIC Project 251209

25X1

1. In response to the referenced requirement, 29 areas and 75 SAM sites in the Riga Air Defense Zone (ADZ) were searched for communications facilities.

2. Only 18 of the 104 search areas were covered by recent large-scale photography of acceptable interpretability. Communications facilities were identified in all 18 areas. The locations, types, and propagation azimuths of the associated communications antennas are presented in Attachment 1.

3. This project is considered to be complete. Questions regarding this project should be directed to [redacted] of the Special Studies Branch, WGD/IEG, on extension [redacted]
